Diary Entry 1

(1) Finalized Topic for Final Project:

Art History – analysing the demographic representations of artists through time.

In the day and age of increasing calls for diversity, I find the analysis of demographic changes in artist representations (such as gender, ethnicity, race, nationality and number of exhibitions in notable museums) particularly fascinating.

(2) Data sources curated so far:

Data sources are derived from Tidy tuesday, as recommended via Canvas!

- Thesis paper - Holland Stam's thesis work, from which data was collected.

- Art History Data Set (to be downloaded from CRAN)

- R code references - from Holland Stam's github page!

- end -
